SORT

5

Changes non-coders can make:

- | | | | | |
|---|---|---|---|--|
| <ul style="list-style-type: none"> • Add/delete stores • Change RMA fields • Add/delete clients • Create a new return reason • Associate a client with a reverse process • More | <ul style="list-style-type: none"> • Add/delete couriers • Add warehouses • Update locations • More | <ul style="list-style-type: none"> • Add/manage a warehouse • Change layout of the warehouse (area, container, location, etc.) • Add processes/sub-processes • More | <ul style="list-style-type: none"> • Change processes • Add sub-processes • Add a new activity • Track a new activity • More | <ul style="list-style-type: none"> • Add/delete vendors • Add/track a new activity • More |
|---|---|---|---|--|

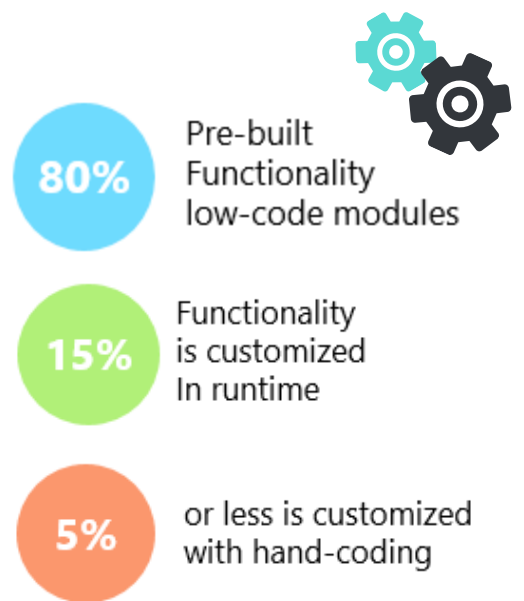

PLUS, NON-CODERS CAN EASILY MODIFY THE UI

- Change a drop down to radio buttons
- Change a title or text, its size or color
- Change the location and size of buttons
- Customize colors
- Add, hide and reorder columns on a data grid
- Add a criteria (filter) to a search bar
- Change an icon
- Change a form field default
- Change the width or height of a panel
- Make a panel collapsible
- Add a menu option
- Many others

BEESION USES A LOW-CODE PLATFORM THAT MAKES CHANGE EASY.

Little to no code is used. Software is built using pre-built modules, and then configured in runtime.

WHY TRUST BEESION

5x

Up to 5x quicker to deploy, support and expand, compared to traditional development

95%

95% of an application is built with drag and drop functionality and embedded tools (not custom code)

29

29 low-code applications/4 solutions

200 M+

Subscribers supported by Beesion's CRM applications

15

Years of developing and implementing low-code telecom software
